Due to Clan member kaTana nearly blew up in excitement due to the AWE4 Mod was out for COD4 he wanted it on the server like now, so during our breaks at work we configured it and kaTana made the final effort to get it working properly.

As of now 7.32pm (GMT) 14th Jan 08, according to Game Tracker we are 1 of only 10 UK servers running the AWE4 CTF mod. :woohoo: :silly: B)

Lets the Flag Collecting begin...
