As you have put alot of hours in and we kinda like ya...

You can join :woohoo:

So welcome to the clan, just get yourself on TeamSpeak and change your Name in the Multiplayer options

Anything you need to know just give us a shout. I will change your Forum tag to Clan member in the next few minutes...

Bob you need to change you name to reflect that you are in the Clan, you can do this via the Multi Options or you can use the console.

To use console, in game press the button above TAB (left of 1) this will give you a drop down at the top. Type /name BoB2 then press enter, this will then set your name properly.

PS sorry for slashing you twice last night :ohmy:

Morning Chaps.....

We've been trying to help Bob2 change his name, as have you boys to i believe..... been talking him thru it step by step and even tho he is computer illiterate it appears that he doesnt get the console when he presses `

I don't know if he's pressing it on the wrong screen.. ie.. does he have to be in the game as its ruining??? or can he do it when he's auto'assigning???

Could there be a reason for this or is he being super dim???

Also after a bit of advice on mice.... Coz i'm pissed off with DazBoy slashing me!!!!

Which ones do u have and are they any good??? Had a quick look at the MX1000.. seems ok... what do u think??

Hi Pooty,

There is an option to enable the console in multiplayer options (i think thats where it is)

Hope this helps.
