## Which anti-virus do you use?

Posted by El\_Nino - 2009/12/28 18:57

---

This is mainly for those of us who have upgraded or are upgrading to windows 7, but it would be good to know what others think of other AV's

Let us know if you are going to upgrade ;)

Since the early days of Vista and it didn't support Norton (not a bad thing) I have ever since run with Avast Free & AVG Free. They both play well together and both have Email scanners.

Norton is system heavy and don't ever ask Andy about it - :woohoo:

What's on yours ?

If you re-arrange the letters of "Norton Antivirus", you get the following.

You may as well stick your dick in the microwave that use this overpriced load of shite!!

It's true, honest.....

AVG rules!!!!!!
