
Battlefield 1943 Delayed Again & Upgrade Time !!

Posted by kaTana - 2010/08/05 12:17

Apparently, Battlefield 1943 has been delayed again. The developers still have no idea when this is coming out. They are now offering full refunds to anyone that pre ordered the game from their site. :unsure:

So it looks like Medal Of Honor is the next release.....

That brings me on to my next problem.

It's upgrade time... any suggestions what CPU/Mobo/RAM I should go for. I'm looking at around £250.

PC Gamer is stating that Phenom II Quad is the best "bang for buck" at the moment (for games, not applications). Any thoughts would be appreciated as it has been a long time since i looked into this.
