
What would you like to see ?

Posted by Quezacotl - 2007/11/30 09:43

We are looking into to purchasing a Dedicated server in the very near future, but we dont know what mode we should go for ?

Current Needs

Low Ping - UK Server
Unbranded
Team Speak - for free

Most providers worth there salt advertise to cover the above, but then we have the hard part, what mode do we go for ?

S&D - its abit boring really
Sabotage - i thinks its great but requires good teamplay
Free for all - 10 a penny, no teamplay
Domination - Seems Certain Death for a server
HQ - Always good, quick turnover of rounds

Then do you stay Stock and stay Ranked, or start to tweak the game and become Unranked ?

This is my little query so its over to you lot for your thoughts...

Good summing up of gametypes Q. I'm definately leaning towards HQ. It's got teamplay but without being so bloody intense as sabotage. Also, mixed type servers aren't as popular as single gametype ones. More importantly, it can be played one-on-one on big maps. If you want deathmatch/team deathmatch, you can agree to ignor the objectives.

I'm still not sure about game options. All the hardcore servers i've tried seem to be much calmer than normal ones, with a ot more kills. I absolute hate is the spam 'nading seen on most servers at the moment. I would love to remove them but then, but maybe we should wait and see.
